Consideration of Funding

Ms. Mooridian commented \$300,000 per year is made available for the grant program. Typically, a portion of that is reserved for municipalities. There is also approximately \$500,000 in the MR&I reserve account.

Chairman Kassian said based on recent experience, a large amount of rural water applications is being received with very few municipal grant requests submitted. The 50/50 split may be something the committee needs to look at in the future. He is not sure that rule should apply any longer.

Ms. Mooridian said the original guidelines did allow for a 50/50 split of the annual \$300,000 between the rural and municipal applicants; however, the rural side can borrow from the municipal funding if needed. She will check into the intent of the original program guidelines and report back at the next meeting.

Motion by Director Rogers and second by Director Kaiser to approve funding in the amount of \$302,076 through the Water Supply Assistance Grant Program for allocation to the following rural water projects:

Dear Brent:

On August 24, 2023, Garrison Diversion's MR&I Committee approved matching water supply assistance grants for the following applications as part of the Cass Rural Water Users District:

Dylan Claus up to \$9,025
 Jack Korthof up to \$8,413

The two-year deadline is soon approaching, and our records indicate these projects have not yet been completed.

The MR&I Committee will meet in August to review outstanding grants and consider new requests. Please contact the above individuals to see if they intend to complete their project and the timeframe needed to do so. If we have not received a response by August 1, 2025, we will assume the projects will not be completed and the funding will be returned to the grant program for future distribution.

If you have any questions, please contact me at 701.652.3194 or at merrim@gcd.org.

Describe Project and Location

City of Cleveland has been experiencing power outages for several days at a time, while power is out we are unable to provide water to residents. The City water storage is a tank under ground that hold 50,000 gallons. With a generator we would be able to provide water for approximately a week to our residents with a generator while power is out. The Water house is equipped for a generator now just the installation of one would help our residents and elderly in town.
